Since cancer is part of medicine, the present discourse deals with medical metaphysics. Medicine provides a simple way, or rule of thumb, for distinguishing between correct and wrong medical metaphysical statements. When my sister developed cancer earlier this year, I was anxious to discover the metaphysical cause of the disease. I have always believed that disease manifests on an energetic or emotional level first and then onto a physical level. Every cancer and related disease starts as a serious, acute-dramatic and isolating conflict-shock experience. It manifests simultaneously on three levels: psyche, brain and organ. The theme of the psychic conflict determines the location of the focus in the brain, and the location of the cancer . We all see the Susan G. Kolman pink ribbons for breast cancer awareness. I would like to address breast cancer from the metaphysical perspective. Breasts are directly linked to nurturing -as is the color pink. Breasts also represent mothering, whether of our children, our family, our spouse or the world in general.

Edgar Cayce Health Database Overview of Breast Cancer - Breast cancer is a complex and devastating disease and the most frequently diagnosed cancer in American women. Breast cancer may occur in men as well as women, but is much more common in women. Annual rates for breast cancer are currently an estimated , new cases diagnosed in the United States .
