The development and application of telematics depend on decision making of actors at a political scene both outside and inside the work organizations. The effects of the use of these applications appear to be co-determined by many other factors. Telematics and Telematics Systems The word “telematics” stems from the combination of telecommunications and informatics, and it was the joining of these two sciences that resulted in the field of telematics. Telematics is an interdisciplinary field that encompasses telecommunications, vehicular technologies, road transportation, road safety, electrical engineering. Telematics makes your car safer, keeps you from getting lost, summons roadside assistance at the press of a button, routes you around accidents, auto-dials if you’re in the accident, and.
